We're very excited to reissue Hisato Higuchi's stunning 2003 debut *She* as an expanded LP/CD on Sept. 22. It features new cover art by Higuchi, two additional songs from the original recording session and remastered audio by Taylor Deupree. This album perfectly captures the 4 a.m. vibe where consciousness, sleep, and dreams slip into each other. To celebrate the reissue, [here's a new video for "Girl Sister"](#) that captures those states.

Hisato Higuchi was born in Nagoya, Japan and now lives in Tokyo. A guitarist and vocalist, Hisato first embarked on his artistic travels as a puppeteer for a theater company. In 1990 he started creating music in his home studio and eventually released his debut CD EP *She* in 2003. Higuchi's spectral tone and haunting sing-style has best been described by Volcanic Tongue's David Keenan as "beautiful melodic/melancholic space-blues that touch on poles as precious as Mazzacane, Keiji Haino and Patty Waters."

More information can be found [here](#).
