Larsen have just released a new ep on [Important Records](#) featuring two ambient (more ambient than usual) tracks with Viking Norwegian producers/musicians/remixers Deathprod and b9 of Origami Galaktika.

HMKE contains a Deathprod remix and an Origami Galaktika remix of two Larsen tracks. The remaining two tracks are unremixed Larsen originals unavailable elsewhere and featuring their beloved cellist Julia Kent (also of Antony & The Johnsons.) The second track, "M," a Larsen original, will be available on the forthcoming Larsen album *Seies* (slated for release on Feb. 2006 on Important) but as a Lustmord/Larsen collaboration and not in this original form.
