"Andy Stott's first release since 2016 and first EP since 2011, *It Should Be Us* is a double EP of slow and raw productions for the club, recorded this year and following on from a series of EPs that started with *Passed Me By* and *We Stay Together* early this decade. P

Recorded fast and loose over the summer, these 9 tracks (8 on the vinyl) harness a pure and bare-boned energy, melodies subsumed by drum machines and synths; slow, rugged abandon. It is all about rhythmic heat and disorientation, pure dance and DJ specials rendered at an unsteady pace, from percolated house and percussive rituals to moody tripped-out burners.

There will be a new Andy Stott album in 2020, but in the meantime... this one's for dancing."
