---

Singer, musician, art director LD Beghtol one of those people who kept you laughing. He released five full-length albums as Flare, but is most famously known for singing in The Magnetic Fields and authoring *69 Love Songs, A Field Guide* for the 33 1/3 book series.

He was also one of the first contributors to Brainwashed.com when we began writing about music in the late '90s.

He will be sorely missed.
